Sophia Wall

Junior Software Engineer

With a background in sales, marketing and graphic design, I am developing my skills to become a full-stack web-developer / software engineer. I have a variety of technical skills and I like to combine the art of design with the art of programming.

PROJECTS

What's On - Find Events Near You!

Are you looking for the best events in town? With What's On, discover new places, artists, foods and more with your friends and family! Enter your current location and see the latest events with a click of a button!

This application utilizes HTML, CSS, Javascript, Handlebars, Bootstrap, Google Events Web API, MySQL, Sequelize, bcrypt, Node.JS & Heroku.

Virtual Holiday - Travel Abroad From Your Home!

This interactive app allows the user to experience a virtual holiday abroad. Begin by selecting a holiday type and be transported away to a new destination. Everything the user needs to recreate the holiday feeling virtually is included - from the scenery and atmospheric music, to a waiter who offers a snack and tells bad jokes!

This application was built using HTML5, CSS and JavaScript (jQuery). This webpage utilises 3 Web APIs to render weather data for a particular location, a snack choice and a joke

[Github Repository](#) | [Live App](#)

Weather Dashboard

This front-end application utilises a weather API to render a 5 day weather forecast for a chosen location. This application was built using Javascript, Weather API, HTML, CSS, Bootstrap and Local Storage.
